# Insulated glass doors for refrigerated multidecks

REMIglas insulated glass doors for refrigerated multidecks keep energy consumption down without competition. Guaranteed.

Remis has over 20 years' experience in the construction and manufacture of refrigerator elements. The company attached importance from the start to the modularity of the products. This means that there are no limits to flexibility in retrofitting and initial fitments.

Improved product presentation promotes sales. With the original glass door systems from REMIS the products remain evenly chilled in the refrigerated multideck and optimally visible for your customers.

The easy-running doors and the comfortable strip handles ensure proverbial ease of access. The advantages of the system are obvious:

**Supports compliance with the European HACCP regulations**

**Over 60 % energy saving**

**Greater security for product quality**

**Targeted customer guidance and longer dwell times**

**Easy-running, self-closing doors**

**Image enhancing through environmental protection**

**Eminently suitable for retrofitting**

**Modular construction**

**High-quality tempered safety glass**

## Ideal for retrofitting as well

### Assembly - child's play!

Thanks to the modular frame construction, the insulating glass systems for re-frigerated multidecks can be installed quickly and easily in existing freezers.

1. Fasten the bottom alignment panel in place (freezer base).
2. Dismantle the night cover and screw in the top and bottom mounting panel.
3. Align the frame.
4. Screw the door frame to the top and bottom mounting panel.
5. Insert doors.
6. Align and adjust the doors.

# REMIglas safe

# Folding doors with system

## REMIglas safe - hinged doors for refrigerated multidecks

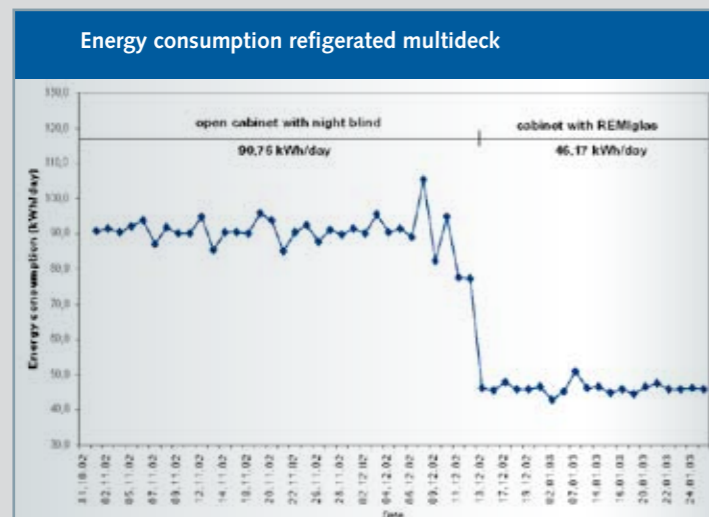

The latest development in glass covers for refrigerated multidecks with above-freezing refrigeration is called REMIglas safe. The hinged door system combines the demand for simple assembly and retrofitting capability with greater flexibility and excellent design.

The sturdiness of the construction and workmanship guarantees a long-service life even with heavy use.

The sturdy frame constructions, easy-running self-closing doors and a solid elegant strip handle satisfy all wishes and formally invite customers to stay longer at the cabinet.

Thanks to the simple automatic locking system filling the shelves is no problem. Simply lock the folding doors in place, fill the shelves, and release the lock by opening the sliding door wider. Child's play. For delicate female hands as well.

## Over 60 % energy savings

And with regard to energy savings as well you are on the safe, that is value-for-money, side with REMIglas glass door systems for refrigerated wall multidecks: with a clearly lower energy consumption of over 60 % your investment will pay off in just a short time.

## Image enhancing through protection of the environment

Your customers have an intensified awareness of the environment. Appropriate commitment on your part will be honoured by store loyalty and good customer relations.

## TL5 lighting – more than just an option

As an option we offer TL5 lighting for our insulating glass door systems. This is fitted between the individual frame modules and is supplied with electronic ballast. The light colours cool-white (840) and 76 are available as variants for meat shelves. Please note that the lighting must be connected by an electrician.

# REMIglas shelf - sliding glass doors

## The glass makes the difference

The special insulating glass prevents condensation and stops the glass from fogging. Along with the aesthetic and optical effect this „transparent“ presentation of freshness underlines the quality of the products on offer.

## Eminently suitable for retrofitting

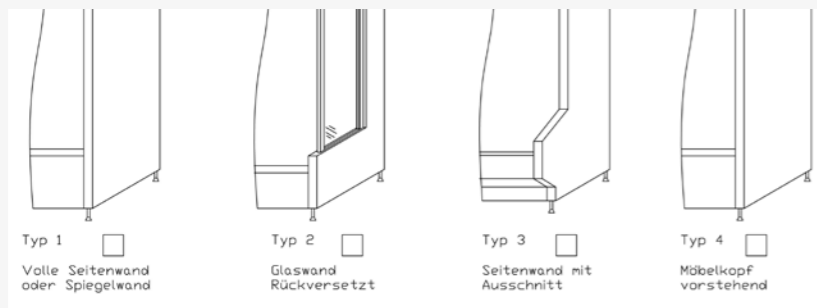

REMIglas shelf can be retrofitted at any time and is supplied customised for all shelves. Even older refrigerators are presented in new colours. Assembly is quick and easy. And guaranteed.

## Ordering made easy

Thanks to the extensive REMIS database we usually need only a few details for your order. All we need are the details on the rating plate. You can simply copy them or send a picture to REMIS. If the chest type has not been registered yet, we have developed detailed instructions for measuring. In individual cases it is practical to have the measurements taken by our trained specialists.

This enables us to produce the right insulating glass door system for every chest type accurate to size. Guaranteed!

## REMIglas shelf - sliding glass doors for refrigerated multidecks

The design and functionality of the tried and tested REMIglas shelf system are constantly being improved. This is why our „classic model“ has never gone out of fashion. On the contrary: its excellent energy saving properties make REMIglas shelf the new star in the supermarket. Because who does not want to save 60 % of the energy consumption of the refrigerated multideck by using REMIglas shelf?

## Functionality guaranteed

Through our wide network of service support points we can guarantee the smooth installation and the functionality of the REMIS insulating glass door systems at all times. With our own installation vehicles and trained specialists we ensure the long-term and trouble-free use of our products.

## Compliance with European HACCP regulations

In future, food inspectors will be taking a closer look... including at quality assurance systems for food in refrigerated multidecks. More exact temperature compliance, continuously over 24 hours, 7 days a week. Product quality guaranteed.
